Reliable Partner. High-end technology

match-trade technologies

SINCE 2018
match2pay
Powered by **Match-Trade Technologies**

We form a strategic partnership with Match Trade Technologies, a leading technology provider for Forex and CFD Brokers. We leverage its decade long experience in the industry and impeccable reputation to offer our client's proven technology as reliable services.

Independent Technology

Match2Pay's technology, developed since 2018, ensures top market standards. We assure high performance and security, independent of third party providers.

Extensive Ecosystem

Match2Pay is seamlessly integrated with leading CRMs and PSPs in the industry, providing fast and effortless connectivity for most Forex Brokers.

Trusted Bank Collaborations

In partnership with MTT, cooperating with FX brokers for over a decade, we've nurtured trust with banks, ensuring smooth fund transfers for our clients.

Global Client Support

We offer global support, catering to clients across various time zones. Our service includes 24/7 technical assistance through multiple channels.

Versatile Tool for Brokers

Match2Pay is registered for virtual currency exchange and wallet operations, catering to a diverse range of clients regardless of their regulatory statuses.

Flexible & Negotiable Fees

Valuing a long term, trust based partnership approach, we provide individually negotiated fees for high volume transactions, supporting our clients' growth.

Start accepting crypto payments

Our solutions to accept and send cryptocurrency payments allows you to give secure and fast payment options to your customers at a very affordable price.

By integrating our payment processor into your merchant infrastructure, you will be able to issue invoices online, manage the flow and risks on your end and add payment and withdrawal methods for your customer accounts. We provide you with a crypto wallet that is fully managed by Match2Pay team, flexible conditions and 24/7 technical support.

Comprehensive & Gasless Crypto Solution

With extensive experience in fintech and crypto, we focus on simplifying settlements and reducing network fees while offering a secure and scalable crypto transactions management, compliant with strict regulatory demands.

Perfect for Forex & Prop Brokers

Leveraging our industry background and expertise in crypto transactions, we provide a robust payment solution already integrated with the most popular CRMs and cashiers. Match2Pay is constantly expanded with new functionalities to match the ever-changing requirements of both Forex and Prop Brokers.

Client Deposit Flow
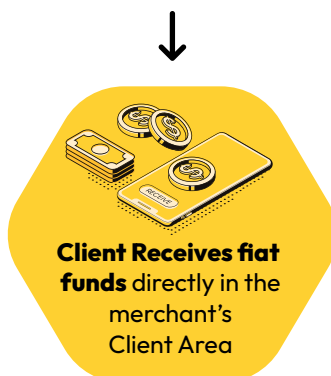

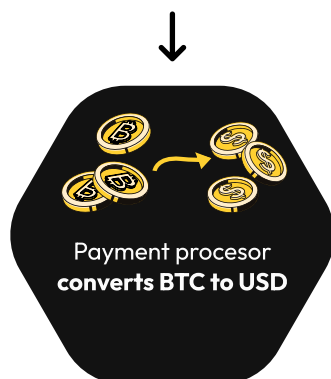

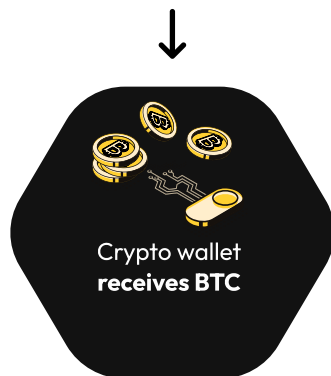

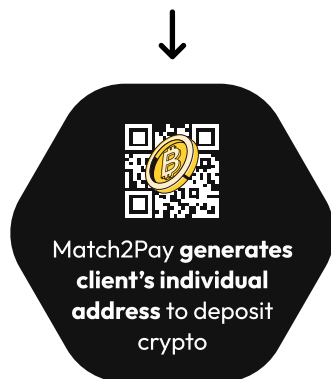

How does it work?

Our flagship product allows you to accept multiple cryptocurrencies, which are settled instantly in the currency of your choice – USD stablecoins, USD, EUR, GBP and many more.

Thanks to that solution you can focus on scaling your business, while we cover the exchange risk and the risk of crypto price volatility. Depending on your industry, you can withdraw your balance in stablecoins.

Tailored for Prop Trading

WOOCOMMERCE

Whether you need an additional global payment method for the challenges, a channel to settle live traders or a safe wallet to manage your crypto transactions, Match2Pay can match your needs.

Match2Pay seamlessly integrates with WooCommerce on WordPress, offering prop trading businesses an easy-to-use, secure, and flexible solution to accept crypto payments.

Key Benefits of using Match2Pay with WooCommerce:

Easy Setup

Installing and activating the Match2Pay plugin adds a cryptocurrency payment option to your checkout page, with our 24/7 support team ready to guide you through any installation challenges for a smooth setup.

Instant Confirmation & Settlement

Enjoy real-time transaction confirmation and seamless processing of cryptocurrency payments, enhancing security, operational efficiency, and client satisfaction while maintaining your firm's liquidity.

Partial Payments Feature

Unique to Match2Pay, our plugin supports partially paid transactions, allowing orders to only update to "Paid" status upon full payment receipt. This feature provides continuous monitoring and control, enhancing your management over transactions.

Simplified Customisation

Tailor Match2Pay settings directly from the WooCommerce admin panel to meet your specific needs. Focus on selecting which cryptocurrencies to accept, ensuring a streamlined configuration process that aligns with your operational requirements.

Other Prop Advantages

✔ Compatibility with Challenges

Our solution can distinguish full from partial payments making demo client management much easier.

✔ Convenient reporting

Our technology allows you to easily generate various reports concerning customers and transaction.

✔ Technology valued by the industry

Our crypto processor was developed by the creators of the Match-Trader, a trading platform used by the biggest Prop Firms including FundingPips, E8 Funding, My Funded FX and more.

✔ 24/7 client support

We address any issues or questions directly via messengers, bypassing the need for a ticketing system.

Enabling businesses with innovative payments

Match2Pay Ltd. is registered in Seychelles, as a virtual currency exchange operator and depository virtual currency wallet operator. The technology was developed by Match-Trade Technologies in 2018 when the consumer demand for crypto payments started growing. Since then, it has undergone continuous development and expansion.

Match2Pay prioritises security and regulatory compliance, offering businesses peace of mind when processing crypto payments. The Match2Pay regulatory oversight ensures adherence to stringent standards and provides an added layer of trust and credibility for business.

Why choose Match2Pay?

We have been developing our solution since 2018 with the support of Match-Trade Technologies – a leading forex technology provider.

✔ Security and Transparency

With a decade-long experience in the industry, we learned to combine the safety of cold wallet storage and advanced security measures with access to 24/7 withdrawals for customers worldwide.

✔ Competitive Fees & Cost Optimization

We offer low entry barriers to the smaller merchants, while larger ones can receive rates allowing them to save on the crypto payments when switching to our solution.

✔ Speed and Efficiency

Our crypto payment gateway is not only stable technologically but it is also complemented by a support team that understands the needs of the merchants operating 24/7 on the global scale.

✔ Compliance with Legal Regulations

We partner with industry leaders offering state-of-the-art KYC, KYT, KYB and blockchain analytics tools to offer a solution compliant with EU regulations and many other jurisdictions.
